

The portions of this proposed Bill will remove content on XM radio which I use daily. I Drive 3000 miles a month and use the local Features of the XM radio o keep posted as I move across the Notheast. I use XM radio to break the tedium of Driving as much as 5 hours a day.

In the same space I listen to on station of XM radio I have to set my FM receiver to 5 different stations, and wait for the traffic and weather to come on.

With the XM system I set one station for the area I'm in and wait no more than 10 minutes for a full cycle of weather and traffic, which then repeats with no commercials.

The commercial stations can take up to an hour to give the same information and are not on a fixed rotation.
